

**What is Mekari Innovator Lab?**

Mekari Innovator Lab is a competition and workshop for college students to learn the skills needed to build a successful and innovative technology product. It's a blend of competition and workshop in one program.

**Who can participate?**

All highly-driven Indonesian undergraduate college students (S1) interested in tech industry. We welcome students from all majors, years, and universities.

**How can I register?**

You need to form a team of exactly 3 people and fill out the registration form on this website.

**Who can be on a team together?**

Members of the same team can come from different majors, years, and universities.

**How does my team get selected to join the workshop?**

All teams will go through a competitive selection process. Please refer to Selection Process on this page.

**Where will the workshop be held?**

The workshop will be held at Hotel Akmani, Jakarta Pusat.

**What can my team win?**

Your team can win up to 30 million rupiah if you win the best pitch on the workshop. If your team does not win, you will still get cool swags and valuable knowledge from the workshop.

**What does the workshop cover?**

The workshop will cover hotels for 23 nights, meals for 3 days, stationeries, and tool kit to help you create a low-fidelity prototype. We do not cover transportation costs.

**What if my team resides outside Jakarta?**

If your team resides outside Jakarta, you will need to cover for your own transportation to/from the city and to/from the hotel since we do not cover them. We suggest that you ask for sponsorship from your university. If you need one, we can provide an official invitation letter confirming your participation in the competition.
